

WideLookLt

TGD has been trading in the production of glass components for refrigeration since 2000:

- trade

- professional

- industrial

- scientific

Our task:

- to diffuse solutions with **better thermal efficiency**, for the best **energy saving** of any refrigerated appliance
- to provide the most **efficient goods presentation** improving our partners products **market value**

In this way we achieve our goal of making our contribution to the creation of a better world

“Wide Look Lt” is the glazed insert from TGD specifically engineered for freezing top appliances of the most advanced retail industry suppliers

The strengths of the line-up frame and door kits are:

Appealing look

High efficiency performance

Sturdy structure

Extreme durability and reliability

Product outlook perfectly matches all major and most demanding retail industry brand requirements.

The **Italian essential design**

highlights stored frozen products, increasing impulse buying behaviour thanks to the correct equilibrium between the dark glass door frame and the powerful LED light massively and regularly expanded all along the transparent area

Wide Look Lt

High insulating performance of the glazed insert is the result of a perfect combination between a Low Energy master frame,

cutting more
than **50%**

of the electrical power of standard similar products and the most advanced **TGD “0 Energy”** glass door, profiting from the top rate anti-glare treatment

Profile design, related assembly technology and innovating materials make the “**Wide Look Lt**” frame the first structural product on the market, able to sustain a significant weight on the top, allowing a cost reduction on the display construction

0,8 Ug Glass Value

Thousands of master frames and doors now exist
on the market and there are only happy end-users

That's the strongest proof of our product reliability

Product configurations:

- All height appliances
- Combi appliances (with bottom chest freezer lighting predisposition)
- Compact appliances for chest freezers upgrade to combi appliances

Standard colours:

- Frame: Ral 7035 + silver satin anodised aluminium
- Door: Glass Ral 7015 + frame silver satin anodised aluminium
- **Personalised glass door colours available on demand**

Lighting versions:

- LED prewired
- LED installed

WideLook^{Lt}

the most beautiful, the most reliable
